**AMENDMENTS TO THE SPECIFICATION**:

Please replace the paragraph beginning on page 10, line 10, with the following:

Referring again to FIGURE 5~~3~~, if an objection is received at 1500, then the communication stations attempt at 1300 to agree on another set of communication session parameters, including at least a different frequency channel. The operations at 1300, 1400 and 1500 can be repeated either until it is determined at 1500 that the communication session can begin at 1600, or until it is determined at 1300 that the communication stations cannot agree on a set of communication session parameters that are acceptable to both communication stations and are also not objected to by other communication stations. If the communication stations cannot agree on communication session parameters at 1300, then operations can return to 600.
